

SLAT CONVEYORS

Move material uphill, horizontally or downhill

Triple/S Dynamics Slat Conveyors are perfect for gently and quietly transporting products that require high levels of sanitation and minimal product degradation uphill, downhill or horizontally. Conveyors require very little maintenance and will transport products over short or long distances.

Available in a range of widths and materials, the conveyor slats are attached to chains which glide on special sanitary UHMW polyethylene chain rails that provide excellent tracking.

A parallel conveyor chain take up system provides uniform chain tensioning and alignment, resulting in low maintenance and extended operating life.

Triple/S Dynamics Slat Conveyors are ruggedly built for continuous around-the-clock operation to solve your unique material handling requirements.

OPTIONAL EQUIPMENT INCLUDES

- CIP spray wash stations
- Hinged or fixed covers
- Catch pans beneath conveyor
- Aspiration hoods
- Sanitary pedestal mounting legs or ceiling hanging brackets
