TSD TEST REPORT

Test Date(s): [REDACTED]

Product: Barium Sulphate

Customer: [REDACTED]

Equipment: Slipstick with Teflon Liner

Purpose: Evaluate the Slipstick for conveying of barium sulphate

PROCEDURE: Measured the moisture of the material at approximately 2.75 percent although we could not clump it in hand. During the product transfer out of the bulk bag, we added 1 percent additional water, but not mixed thoroughly, sprinkled while scooping.

CONCLUSION: Product conveyed very well on the test Slipstick with Teflon liner.
