

PENDULINKTM SUSPENSION High Efficiency

THE HIGH-EFFICIENCY PENDULINK™ SUSPENSION SYSTEM

Adapted from the time-tested open rocker bearing and tension rod suspension used in heavy-duty SLIPSTICK® Conveyors, with the addition of coil spring isolators the PENDULINK system achieves 98.5% vibration isolation in TEXAS SHAKER® Screening Machines. Base-mounted with the PENDULINK suspension system, the TEXAS SHAKER in all sizes now runs as smoothly as it always has with cable suspension.
